Summary

Product Manager with 8+ years overall in SaaS product development, AI agent platforms, and US Healthcare Revenue Cycle Management automation. 200K+ transactions/month → Owns Agent processing across enterprise clients. Expanded payer coverage and reduced failure rates → Leveraged data-driven analysis. Delivered scalable product architecture → Enabled multi-agent healthcare automation.

Experience

2023 – present
Pune, India

Associate Product Manager
Infinx Healthcare

- Own end-to-end product roadmap for the Claim Status Agent, an AI-powered agent processing 200,000+ claims/month across enterprise healthcare clients, saving over 120 FTEs in manual effort.
- Launched several API integrations with vendors across 4 different usecases achieving 96–99% transaction success rates across all clients within the first 10 days of rollout.
- Identified 70,000+ unautomated claims across 26 payer–client combinations; built a prioritized activation roadmap with top-5 quick wins covering ~58K transactions. Executed and secured a 20% improvement, resulting in 35+ FTE savings.
- Building a unified Agent Platform for all AI agents company-wide under a single scalable architecture.
- Shipped features on the existing platform including LLM-assisted RPA, Analytics & Support Dashboards, Credential Management, and API Rate Limiting.
- Built a vendor intelligence tracker using Cursor, Lovable and Claude across 2,000+ vendors with Enhanced API, Enhanced RPA, and Standard API coverage flags — used for strategic coverage planning and client onboarding decisions across the organization.

2021 – 2023
Remote

Product Analyst
Infinx Healthcare

- Delivered 30+ RPA and API integrations across RCM processes, contributing to 150,000+ automated transactions/month. Expanded automation platform to 50+ clients solving claim status, eligibility verification, and payment posting use cases.
- Produced product demo recordings adopted by marketing for client acquisition and partner onboarding.

2018 – 2021
Hyderabad, India

Senior Quality Specialist
Amazon

- Led a 20-person team across internal audit workstreams including OCR for road signs, street view imagery validation, and quality assurance across multiple business models. Developed and implemented SOPs to streamline compliance.
- Identified and reported numerous bugs by incorporating feedback from social media escalations, customer forums, and internal stakeholders.
- Contributed to Amazon Maps across the US and Europe; conducted extensive GPS trace data analysis from Amazon drivers. Identified and resolved geo-code issues, improving mapping precision and reliability.

Education

2014 – 2018
Bhubaneswar, India

Mechanical Engineering | B.Tech
KIIT University
